

SERIES 2.1

CENTENNIAL
— EDITION —

CENTURY ONE.
EVOLVING NOW.

Series 2.1

Centennial Edition.

A legacy of technical
refinement pushed to its
ultimate expression.

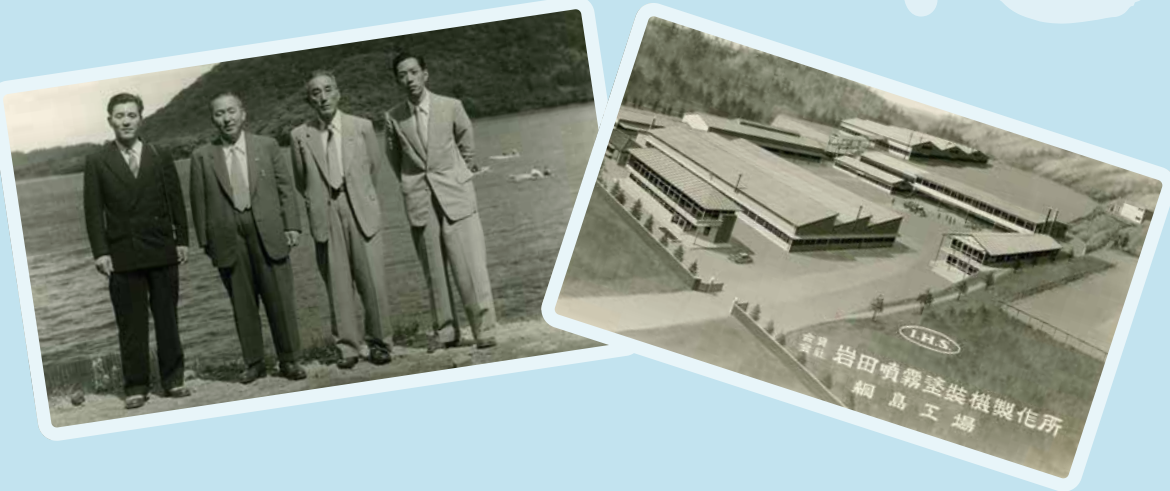

The new benchmark for
those shaping the **future**
of **high-end finishing.**

01

Earnest, Honest, Yours.

Anest Iwata traces its origins to the dedication of the **Iwata brothers** in **1926**. Their vision established the principle of **Makoto no Kokoro**: a sincere heart that governs every engineering choice. For one hundred years, this **commitment to integrity** has ensured that the pursuit of quality remains the primary objective, focused on absolute reliability - **for the results you deliver every day**.

誠心

Our story originates from the fusion of the concepts of **Earnest** and **Honest**.

As a **global reference** in coating and fluid application technologies, we translate technical understanding into **high-precision instruments**. Every solution is designed to ensure that our century of **heritage**, in **your hands**, makes the **difference**.

Century One marks the start of a **shared journey**, dedicated to shaping the future of surface finishing, **together**.

02

The Evolution

1927

MODEL-1

The **first spray gun** manufactured in **Japan**. The Model-1 establishes the **foundation** of the company, embodying the principle of harmony through **manual craftsmanship**. This instrument marks the **origin** of Japanese spray gun technology.

**Not perfect,
but honestly made.**

1957

WIDER-57

A turning point in **technical design**. The WIDER-57 results from fundamental research into **atomization physics**. It represents the first instance where the form of the spray gun is engineered to prioritize both **functional performance** and **ergonomics**.

**Shaped to work
and feel right.**

1991

LPS-1

The introduction of **low-pressure technology**. The LPS-1 shifts the focus toward **environmental responsibility** and resource efficiency. It defines a **new standard** in professional application, minimizing material waste while maintaining **operational consistency**.

**Less waste,
more responsibility.**

1992

LPH-90

Taking low-pressure technology to the **next level**, the LPH-90 perfects the balance between fluid precision and environmental impact, serving as a critical step in the development of **efficient coating systems**.

**Refining
the standard.**

02 | The evolution

1997

W-100

A total review of **structural design**, developed to deliver **uniform atomization** and a flat, wide pattern. The W-100 marks our commitment to environment-friendly technology and high- performance, **efficient application** for **global workshops**.

The “W”
series begins.

2009

W-400/WS-400 SERIES

A synthesis of **long-standing experience** and advanced design. The W-400 series represents the peak of the “W” evolution, bridging the gap between **historical performance** and the **contemporary requirements** of surface finishing.

The peak
of W-evolution.

02 | The evolution

READY FOR THE SPACE AGE?

Cera-Shield **Coating**.
Premium Titanium **Core**.

The **Series 2.1
Centennial Edition**
applies **physics**
derived from
**extreme
environments** to
redefine what
stability feels like.

CERA-SHIELD COATING

Perfect the finish

This **ultra-dense layer** is integrated into the aluminum substrate, creating a surface of **extreme mechanical hardness** that **resists impacts** and **minimizes friction**.

**Uncompromised
resistance,
total reliability.**

PREMIUM TITANIUM CORE

Craft consistency

Premium titanium combined with high-precision machining guarantees **superior chemical resistance** and **dimensional stability**, ensuring the nozzle holds its alignment regardless of duty cycle.

**Flawless
spray patterns,
every time.**

Three specific tools. One signature finish.

WS-400 BASE

Ultra-fine atomization for today's one-visit basecoats. Perfect color matching even on complex shades.

Faster process, more jobs done.

LS-400 BASE

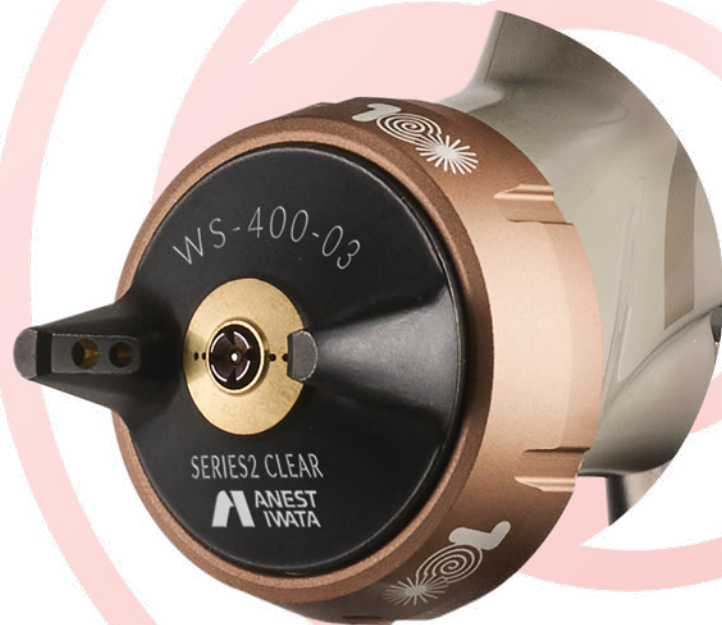

HVLP technology for waterborne and solvent-based basecoats. Stable droplet size, consistent results in all conditions.

Save paint and time, save money.

WS-400 CLEAR

Balanced clearcoat distribution for a smooth, high-quality finish. Precise application without constant manual adjustments.

Less re-work, more profit and confidence.

Inside the Centennial Edition Set

This **custom-built plastic case** integrates the complete set, ready for application:

- Series 2.1 Centennial Edition digital spray gun
- 600 ml gravity cup
- Cleaning brushes
- Universal spanner
- Air distribution plug

Equipped for the evolution ahead.

A **CENTURY**
OF PRECISION
REFINED FOR
YOUR NEXT
FINISH.
