POWER
3,9 kW - 5,2 HP

APPLICATION
Oils and lubricants mixed
shavings

CAPACITY
200 lt

FEATURES

- Filters and reuses lubricating and cutting oils
- Simplified liquid collection and swarf handling
- Simultaneously vacuums and discharges the filtered liquid
- Robust painted-steel construction

HIGHLIGHTS

SUCTION UNIT

Suction is provided by 3 by-pass motors controlled by a single switch that allows them to start sequentially, avoiding current spikes. The motors are inside a sturdy enclosure, with an insulating sponge to maintain a low noise level.

SEPARATION UNIT

The collected liquid passes through a grid basket, which traps the chips and simplifies their disposal. In this way, even the smallest solid particles can be separated, making the filtered liquid suitable for reuse.

360° ROTATING INLET

360° rotating material inlet. Provides full freedom of movement without the need to move the vacuum cleaner.

LIQUID DISCHARGE SYSTEM

An electric pump is installed inside the container and allows the extracted and filtered liquids to be discharged quickly. Thanks to the non-return valve, it is possible to suction and discharge at the same time, without stopping the machine.
